

**GTOSS** CAD software

# Foundix II

**Easy and Quick Drawing by Original Functions!**  
**Positive Impression to Client for Better Reliability and Negotiation**

“Foundix II” is a CAD package designed for drawing plans of Silent Piler works. This software has own special functions to make drawing works efficient. What you need is to learn the basic operation of Foundix II and AutoCAD.

The plans prepared by Foundix II will give positive impression to your client and employer, because accurate and detailed information is available. It will make you in favorable position in negotiation. In addition, drawing work can be improved and more efficient work plan can be made.

Foundix II is developed for press-in works.
