

6 Test Field

5 kinds of ground are reproduced and experiments are conducted by using real machines.

7 TSUNAMI simulator

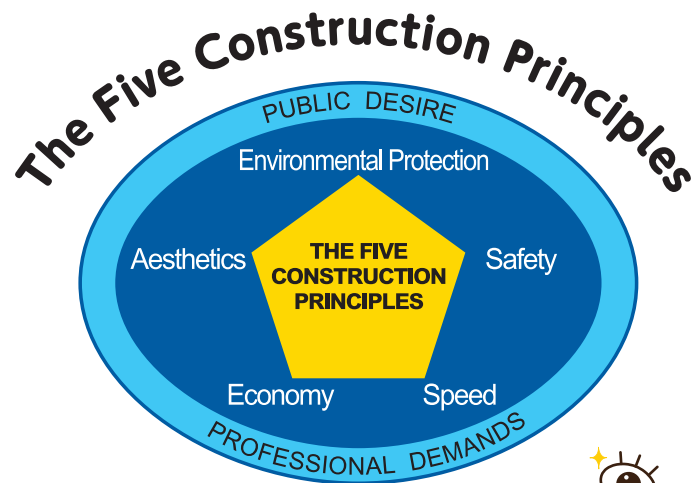

It generates tsunamis in a water tank to compare the performance of two types of levees, showcasing the robustness of the levee developed by GIKEN.

8 Sky Garden

There is a rest area outside located on the second floor of the building.

GIKEN develops machines and construction methods in compliance with "The Five Construction Principles."

This symbol implies "Public Eye."
It is a standard that defines an ideal construction method that everyone can agree on.

* I.C. refers to an expressway entrance and exit.

Welcome to GIKEN

Wondering what kinds of technologies are waiting for us?

Implant Method Changes Worldwide Construction

GIKEN

GIKEN LTD.

1 ECO Park™

(Earthquake-Resistant Underground Parking)

It is an automated parking system that stores vehicles in the basement built with pressed-in piles. There is also a version for bicycles, which is called "ECO Cycle™".

*Installed in 1994.
Renewed in 2018.

Culture Aboveground,
Function Underground.

Mobile ECO Cycle™

Bicycle parking system that can be quickly assembled and easily relocated by applying the "ECO Cycle" technology.

EV ECO Park™

It is a unique parking facility dedicated for ultra-compact EVs. While keeping the functions of the ECO Park, space-savign, high-capacity designs and charging function have been added.

2 Kochi Head Office Factory

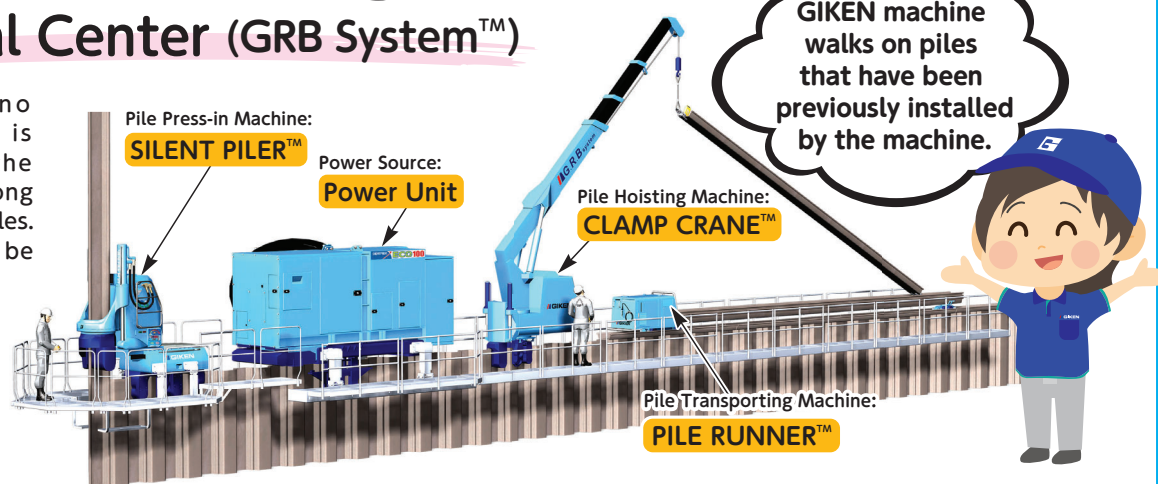

This is where new machines are developed and pre-shipment inspections are done.

Wow,
Impressive!

3 Technical Center (GRB System™)

In the GRB System, no temporary scaffolding is required because all the equipment advances along top of already installed piles. Thus, press-in works can be carried out in various sites, including narrow spaces, high places and over water.

Pile Press-in Machine:

SILENT PILER™

Power Source:
Power Unit

Pile Hoisting Machine:
CLAMP CRANE™

Pile Transporting Machine:
PILE RUNNER™

GIKEN machine walks on piles that have been previously installed by the machine.

Whole View of GIKEN Kochi Head Office

Lots of researches and experiments are conducted at GIKEN Kochi Head Office.
