

VELO-CITY GLOBAL 2016

Location : Taipei City, Taiwan

Completion : February 2016

Actual system exhibited at the world's largest international cycling conference in Taipei, Taiwan

GIKEN exhibited an actual Mobile ECO Cycle system (a movable bicycle parking system) at Velo-city Global 2016, the world's largest international cycling conference.

With storage and retrieval demonstrated on an actual system, there was a lot of interest among experts from around the world who were participating in the conference.

Nighttime lighting and other design features created an attractive bicycle parking facility that brightens up urban environments. Embodying the Mobile ECO Cycle concept, the system is easy to setup and remove, enabling people to easily use bicycles anywhere and anytime.
