

GIKEN LTD. Kochi Head Office Bicycle Parking

Location : Kochi-shi, Kochi

Installed : August 2012 (Unit No.1)

March 2019 (Unit No.2)

Bicycle parking units built at Kochi Head Office to demonstrate the underground facility development

Unit No.1

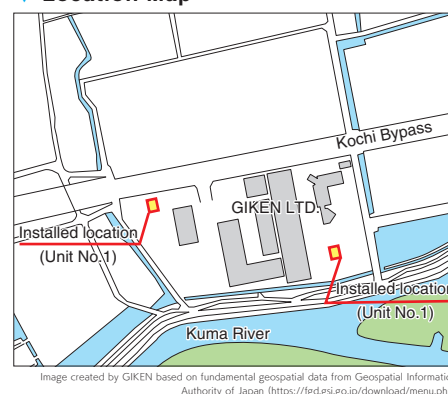

The first bicycle parking unit was built in August 2012 for employee parking and promotional use, with the second unit built in March 2019 in response to expansion of the new office building. The facilities have operated without trouble over these seven years despite several typhoons hitting the area. With one using passwords and one using IC cards, they enable visitors to experience two separate authentication methods. Also, unit No.2 is included in the standard head office tour so that visitors can experience an underground system as well as the adjacent ECO Park system (see page 25).

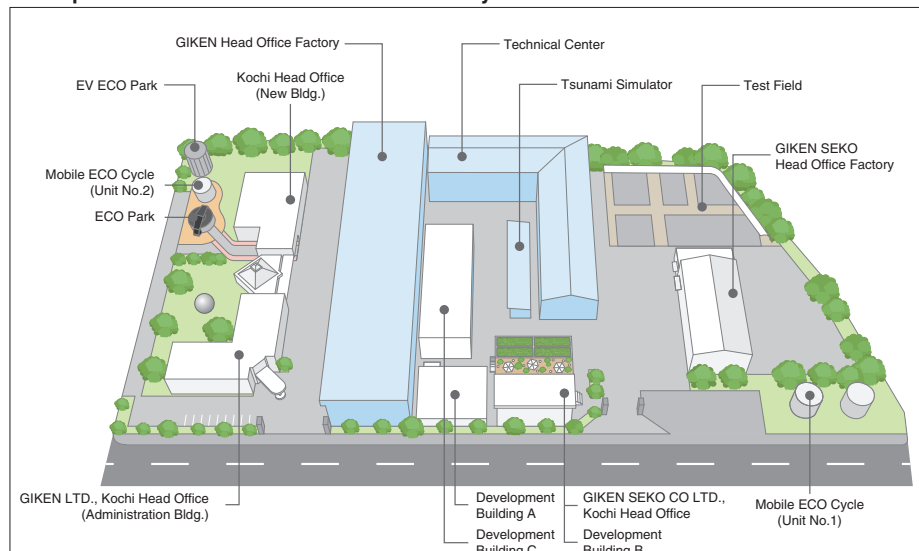

Unit No.2
