

# ECO Park at the OTEPIA Library Complex

Location : Kochi City, Kochi Prefecture

Completion : December 2017

Owner : Kochi Prefecture

## First ECO Park delivery to public facility

OTEPIA, a library and museum complex building jointly completed by Kochi Prefecture and Kochi City, installed one unit of ECO Park. This installation is the first delivery to a public facility. This ECO Park is an exclusive model that accommodates 60 vehicles, ten more than the standard model. The tubular piles were installed in a cylindrical form by Giken's press-in methodology to construct the underground structure. To attract visitors, a broad area of the exterior part of the exit and entry booth is in a glass. Visitors often come to enjoy the view of the parking process from this glass. The installation embodies Giken's concept of "Cultural Aboveground and Function Underground," and creates an open space aboveground.
