

Silent Piling Technologies and Implant Structure

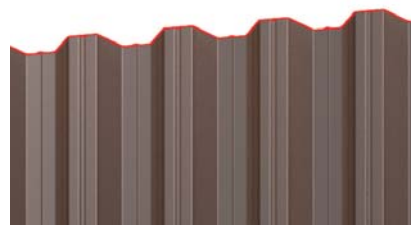

Giken Walls

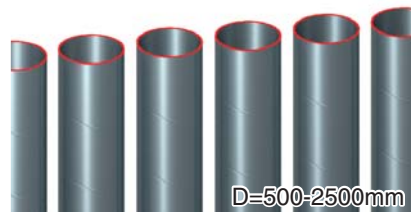

Giken Foundations

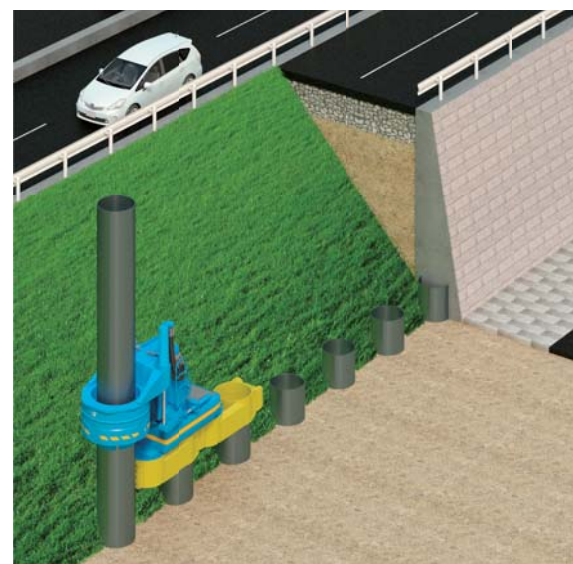

Combi-Gyro Wall

Sheet Pile Wall

Tubular Pile Wall

Backfill Retaining Wall Type

In the presentation

As the leading engineering company in the Press-in piling industry, GIKEN has been advocating Implant Foundations. Implant Foundations are firmly embedded into the ground utilising the Press-in Method. Therefore, the foundations being capable of withstanding extremely heavy loads, are robust, resilient and reliable.

In the presentation, the whole secret of the technologies will be revealed.
