Financial Results Overview FY2024

Financial Results Trend — Key Points

(1) Construction Machinery Segment

- ◎ **In Japan, while construction investment remained strong, a reduction in the scale of government-funded construction projects due to rising costs impacted capital investment by users.**
- ◎ **Overseas, sales of products (including used ones) of large-scale specialized machinery grew.**
- ◎ **Selling, general and administrative expenses, including personnel expenses, increased.**

(2) Press-in Work Segment

- ◎ **In Japan, orders were steadily received for development-oriented projects* with high-value.**
- ◎ **Selling, general and administrative expenses decreased as the number of overseas consolidated subsidiaries decreased by one (FY2023 4Q).**

* Development-oriented projects are construction projects using our developed products or methods that we have not yet made generally available.

Financial Results Trend — Full year

- Net sales increased by 0.7% year on year to JPY 29,481M.
- Operating profit increased by 11.4% year on year to JPY 3,324M.
- Profit increased by 187.9% year on year to JPY 2,437M.

Unit: Millions of JPY

Trend of Net Sales by Segment — 4Q (Jun–Aug)

Construction Machinery Segment

Unit: Millions of JPY

Press-in Work Segment

Unit: Millions of JPY

[Factors in sales changes: 4Q (Jun–Aug)]

- Domestic:
- Decline in sales of products attributable to surges in prices
- Overseas:
- Sale of large-scale specialized machinery to a user in the US
 - Sale of large-scale specialized machinery to a user in Singapore
 - Sales of large-scale specialized machinery to users in the Netherlands, Italy, and Denmark
 - Sale of general machinery to a user in Taiwan

[Factors in sales changes: 4Q (Jun–Aug)]

- Domestic:
- Decline in the amount of progress in construction following good progress in 3Q
- Overseas:
- Increase in demand for rentals with operators in Germany due to market expansion

Trend of Operating Profit by Segment — 4Q (Jun–Aug)

Construction Machinery Segment

Unit: Millions of JPY

Figures in brackets show the operating profit margins.

[Factors in profit margin changes: 4Q (Jun–Aug)]

- Decline in the gross profit due to the decrease in net sales

Press-in Work Segment

Unit: Millions of JPY

Figures in brackets show the operating profit margins.

[Factors in profit margin changes: 4Q (Jun–Aug)]

- Increase in development projects with high-profit margins
- Increase in selling, general and administrative expenses, including personnel expenses

* Profit: Net income attributable to GIKEN LTD.

(1) Construction Machinery Segment

- ◎ **Solid increase in customers' capital investment**
 - Domestic infrastructure development, including measures to strengthen national resilience and Noto Peninsula Earthquake recovery and reconstruction projects, expressways, and ports, is expected to remain strong.
- ◎ **The impact of rising steel prices and increasing labor costs is required to be closely monitored.**
- ◎ **While staying focused on the regions where market development is getting on track, continue overseas expansion.**

(2) Press-in Work Segment

- ◎ **Orders steadily received primarily for development-oriented projects.**
 - Orders are expected to be steadily received for development-oriented projects, including, construction and renovation of national highways and expressways, flood control projects in river basins, railway grade separation projects, and facility development-oriented projects in power plants.

Forecast — Sales and Operating Profit

[Factors in sales changes]

- It is projected to continuously increase the sales of products which improve the productivity in hard ground construction sites, as well as of which data can be collected for our market and product development.
- Sales are expected to increase in the Europe and Asia regions, where market development is getting on track.
- Orders are expected to be steadily received for development-oriented projects.

[Factors in operating profit changes]

- Sales of large-scale specialized machinery are expected to increase in Japan.

Financial Results Overview FY2024—Construction Machinery Segment Net Sales by Category

Unit: Millions of JPY

- In Japan, while sales of the SILENT PILER F112 were robust, sales volumes of machinery products used in the construction of permanent structures decreased due to inflation. Overseas, sales were driven primarily by machinery sales to North America.
- Robust growth in sales of maintenance and parts as the number of operating machines in the market increases.

Progress in Domestic Business

2024 Noto Peninsula Earthquake emergency reconstruction work
Press-in technologies were adopted for the reconstruction of the Noto Ohashi bridge in the Noto-Satoyama Kaido expressway.

Before the construction

Under construction

Under construction

GIKEN SEKO built earth-retaining walls quickly, without closing the traffic.

Overseas — Review FY2024

Establish GIKEN business model overseas

Building up press-in markets: Develop potential markets in response to the needs that we can serve through offering press-in technology based on the expertise of GIKEN.

Growth of the press-in industry: Expand the industry leading the press-in work through developing the press-in market and offering high-added-value technology to address social issues.

Regions where market development is getting on track

■ Europe

- ✓ Market formation has been progressing in the Netherlands through a project of quay wall renovation for the World Heritage-listed canal in Amsterdam (shifted to commercialization phase), as well as a river embankment reinforcement work conducted as part of the Delta Program, among other projects.
- ✓ “GTOSS Europe,” the European version of GTOSS, was launched to strengthen our business foundation and improve customer loyalty in existing markets.
- ✓ Promotion of our method has been undertaken with our business partner Seika Sangyo GmbH (Head office: Germany).

■ Asia

- ✓ Market development in Thailand is actively pursued mainly through riverbank construction projects.
- ✓ Market research has just been initiated in India.
- ✓ Gyro market formation in Singapore is vigorously promoted.
- ✓ Efforts are made in collaboration with partner companies for market expansion in China.
- ✓ Market formation is progressing in Taiwan, supported by increasing awareness about pollution from construction work.
- ✓ ODA market is expanding.

Other regions

■ North America

- ✓ We are doing market research and detailed analyses for rebuilding business strategies for press-in market expansion with the best suitable to the regional characteristics.
- ✓ “GTOSS North America,” the North American version of GTOSS, was launched to strengthen our business foundation and improve customer loyalty in existing markets.

■ South America

- ✓ Aiming to develop business in Brazil, we are building the business plan (by the end of 2024) jointly with MITSUI & CO., LTD. supported by JICA, based on which we will make technical proposals for infrastructure projects with a potential of press-in construction.

Building up markets which have steady growth in Europe and Asia through spreading the GIKEN business model. Applying this policy, we implemented our actions overseas based on the GIKEN business model for accelerating overseas market expansion.

Progress in Overseas Business

We delivered SILENT PILER CLP200A, a tubular sheet pile press-in machine for ultra-low-headroom, to one of the leading users in North America. It was the first press-in machine for ultra-low-headroom delivered in North America.

It was adopted for a flood prevention project. We are hoping that the scope of its application will be expanded.
